

TOP Performance

CONSULTANCY

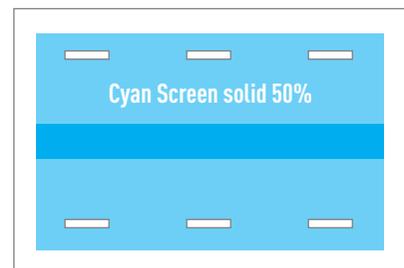

Optimization of ink presetting to the customer's color standard.

1. Calibration of printing units

- Zero-setting of all **ink sides**
- Basic setting of all **ink vibrators**
- Basic setting of all **inking units**
- Basic setting of all **dampening units**

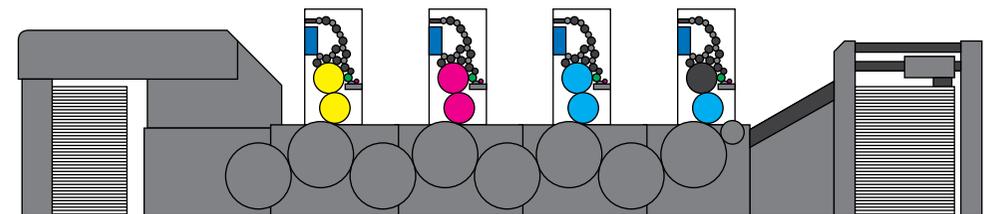

- Test print of first printing unit by using a **screen solid**
- Finding the **lowest** dampening water level
- Test print **all other printing** units under the same conditions

2. Optimization of Prepress/ Press workflow

- **CtP System:** Plates exposed & CIP-3 file created
- **CIP-3:** CIP-3 File sent to PressManager or job card
- **Printnet Press Manager:** Setup CIP-3 inking information (PrePress Link)
- **Press Pilot:** CIP-3 File merged into job and sent to Press Pilot
