

# Manroland PitStop

## PROACTIVE INSPECTION SERVICE

A PitStop inspection is a short and simple operational check of a machine's electrical, print and mechanical modules. Rather like a pit-stop for a racing car, this inspection provides a quick, accurate indication of whether the press's modules are operating at optimum efficiency, or whether some minor adjustment or refurbishment may be required.

## PitStop Inspection

The Pit Stop inspection involves the following services:

- Contract-free inspections
- Focusing on individual modules and units
- Fast planning time
- Low cost
- High security
- Cleanliness provided on inspected module
- Resulting in an official inspection report

## Electrical

- ColorPilot-FDM 17/  
FDM 20 / FM 19
- Feeder
- Printing unit
- Delivery

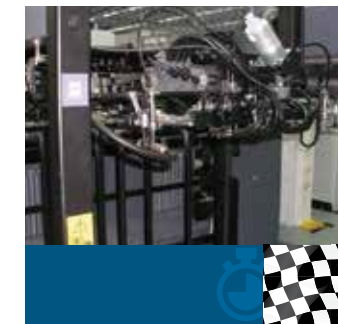

## Print Technology

- Printing unit
- Wash-up device

## Mechanical

- Gripper
- Feeder
- Feed register
- Perfecting
